

FS-MTCC-150.Alu Closed conveyor

Work modulair, safely and with low maintenance

We continue develop and modify our transportsystems, with a view of supplying you with low maintenance, most efficient, reliable and safest solution.

FS Solutions now also supplies our Mat-Top conveyor with a closed surface instead of an open t-slot. Witness for yourself how powder no longer sticks into the frame construction because of the closed profile.

The benefits of our Closed system

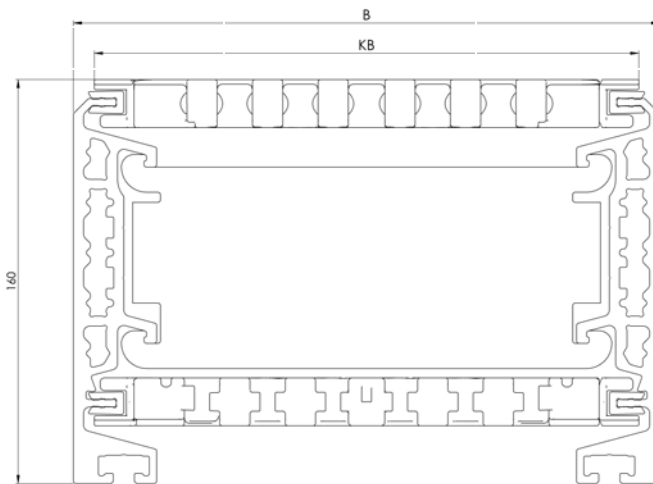

- Closed design, yet modular
- Fewer openings and inside t-slot
- Chain width almost equal to frame width
- Safety tab, so also a very closed system in the bend
- Application of ULF low friction wearstrip longer conveyors possible, or lower power consumption
- Very stiff profile, which means fewer legs and / or suspension is required

Technical specification FS-MTCC.150.Alu

Product width: 100 till 1000
Maximum product weight : mm 30 kg
Maximum load: 350 kg
Maximum conveyor length: 30 meter
Maximum conveyor speed : 60 m/min

	Mat-Top width	Overall width
FS-230-MTCC-150	190 mm	232 mm
FS-350-MTCC-150	305 mm	346 mm
FS-420-MTCC-150	381 mm	423 mm
FS-500-MTCC-150	457 mm	499 mm
FS-650-MTCC-150	610 mm	651 mm

FS Solutions

Looking for a solution for your logistical transport?

Since 2005 FS Solutions provides internal transport for various industrial clients on all continents. We offer a wide range of tailor-made solutions. From individual components to the STRETCH_LINE system and our own innovations such as the Mat-Top conveyor.

A system for every industry

A box of eggs requires a completely different way of transport than a car. But whatever you transport – FS Solutions is happy to help you get the most out of it.
